SKILLS

AI in Testing

Playwright MCP · LLM agents · Claude · GitHub Copilot · AI test generation · Prompt engineering for QA · AI failure triage

Testing AI Systems

DeepEval · LLM & RAG evaluation · Hallucination checks · Prompt-injection & safety · Golden datasets

Test Automation

Playwright · Cypress · Selenium · Appium · Katalon · SHAFT · POM & fixtures

API · Data · Performance

REST / JSON · Postman · SoapUI · Advanced SQL · JMeter · LoadRunner

Languages

TypeScript · JavaScript · Python · Java · C# · C

Process & Tools

Agile / Scrum · Risk-based testing · CI/CD · Git · Jira · TestLink

LANGUAGES

Arabic — Native

English — Professional

Ahmed Ashour Hussein

Senior SDET · QA Lead · AI-Augmented Test Automation

Playwright · Playwright MCP · LLM Agents in QA · Testing AI Systems

12+ years in quality engineering

6 industries: logistics to payments

3 countries of rollouts

PROFILE

QA Lead and Senior SDET with 12+ years in web, mobile, API, embedded and payment systems. I build **Playwright** automation that teams trust, and I put **AI agents to work across the testing lifecycle**: Playwright MCP-driven exploration and test generation, LLM-assisted test design and failure triage, with engineers keeping control of every quality decision. Currently leading QA for Sirdab's B2B logistics platform. ISTQB and Agile certified, PMP trained.

EXPERIENCE

QA Lead

Aug 2024 - Present

Sirdab · B2B logistics & fulfillment platform

- Lead quality for a **B2B warehousing & fulfillment platform**: merchant portal, orders, SKUs & inventory, inbound/outbound shipments, warehouse capacity & slots, quotes and e-commerce integrations.
- Built and own the **Playwright (TypeScript) automation framework**: Page Object Model, custom fixtures, UI + API layers, parallel runs and trace/video reporting, running in CI on every release.
- **Brought AI into the testing lifecycle**: connected Playwright MCP to LLM agents (Claude, GitHub Copilot) to explore new features, draft scenarios from user stories and generate Playwright specs that engineers review before merging.
- Defined the **QA strategy, risk-based test plans and release gates** for multi-step business flows (create → add items → adjust → submit) and for data integrity across integrations.
- Coach the QA team on Playwright, prompt engineering for QA and **human-in-the-loop review** of AI-generated tests. Set code-review standards for test code.

`Playwright` `Playwright MCP` `TypeScript` `Claude / Copilot` `API testing` `CI/CD` `Jira`

Automation QA Engineer

Jan 2022 - Jul 2024

Alef Education · Remote · Abu Dhabi, UAE · K-12 EdTech

- Automated regression suites for large-scale **digital-learning web applications** using **Cypress (JavaScript)**.
- Wrote test plans and manual test cases covering functional, UI and usability quality across several platforms.
- Proposed and rolled out an **automated bug-tracking process** that surfaced issues earlier in the cycle and reduced QA-driven deadline slips.

HOW I USE AI IN QA

01 **Agents explore, humans decide**
AI drafts tests; engineers own what gets merged.

02 **Grounded generation**
MCP gives agents the real DOM and accessibility tree, so specs use stable, role-based locators.

03 **Measured trust**
AI output is reviewed, versioned and run in CI like any other code.

Ahmed Ashour Hussein

EXPERIENCE, CONTINUED

Lead Test Automation Engineer L1

Mar 2020 – Jan 2022

ITWorx · Cairo, Egypt · Software services

- Automated regression for enterprise workflow apps (Syngenta) with **Selenium WebDriver & Katalon** in C#, Java and Groovy.

`Selenium` `Katalon` `C#` `Java`

Senior System Validation Engineer

Oct 2017 – Mar 2020

El Sewedy Electrometer · 6th of October, Egypt · Smart metering

- Validated **DLMS smart-meter** firmware and software for Egypt, Lebanon and India rollouts, combining manual and Selenium (Python, C#) automation.
- Owned test plans and evaluation reports and mentored junior QEs starting out in automation.

Embedded Systems Developer & Tester

Jun 2013 – Sep 2017

Smart Cards Applications · Smart Village, Egypt · Payments

- Developed and tested **POS payment applications** (PAX, SAND, VeriFone) for national Ration, Bread and Flour subsidy programmes, working directly with the hardware design team.

SELECTED PROJECTS

Sirdab: B2B Logistics Platform
Warehousing & fulfillment SaaS. Playwright UI + API framework, MCP-driven exploratory test generation, release quality gates.

Edugate: Education Platform
End-to-end Playwright suites with AI-augmented test design (Playwright MCP + LLM agents) and CI-gated releases.

Alef Platform: K-12 Learning
Cypress regression automation for digital-learning web apps used by schools at national scale.

Syngenta GARF · ATP · RIMS
Enterprise request workflows & reporting. Katalon (Java/Groovy) and ITWorx C# framework.

DLMS Smart Meters: EG · LB · IN
Web + embedded smart-metering systems for three countries, validated with Selenium (Python).

National Subsidy POS
Embedded payment applications on PAX, SAND & VeriFone terminals for the Ration, Bread and Flour programmes.

EDUCATION

B.Sc. Communications & Electronics Engineering

2010

Faculty of Engineering, Cairo University · Graduation project: Automated Broadcasting Wireless Vehicle · **Grade: Excellent**
